

Wikidata coverage and chemical novelty of PlantMetWiki metabolites (4,111 InChIKey-annotated metabolites)

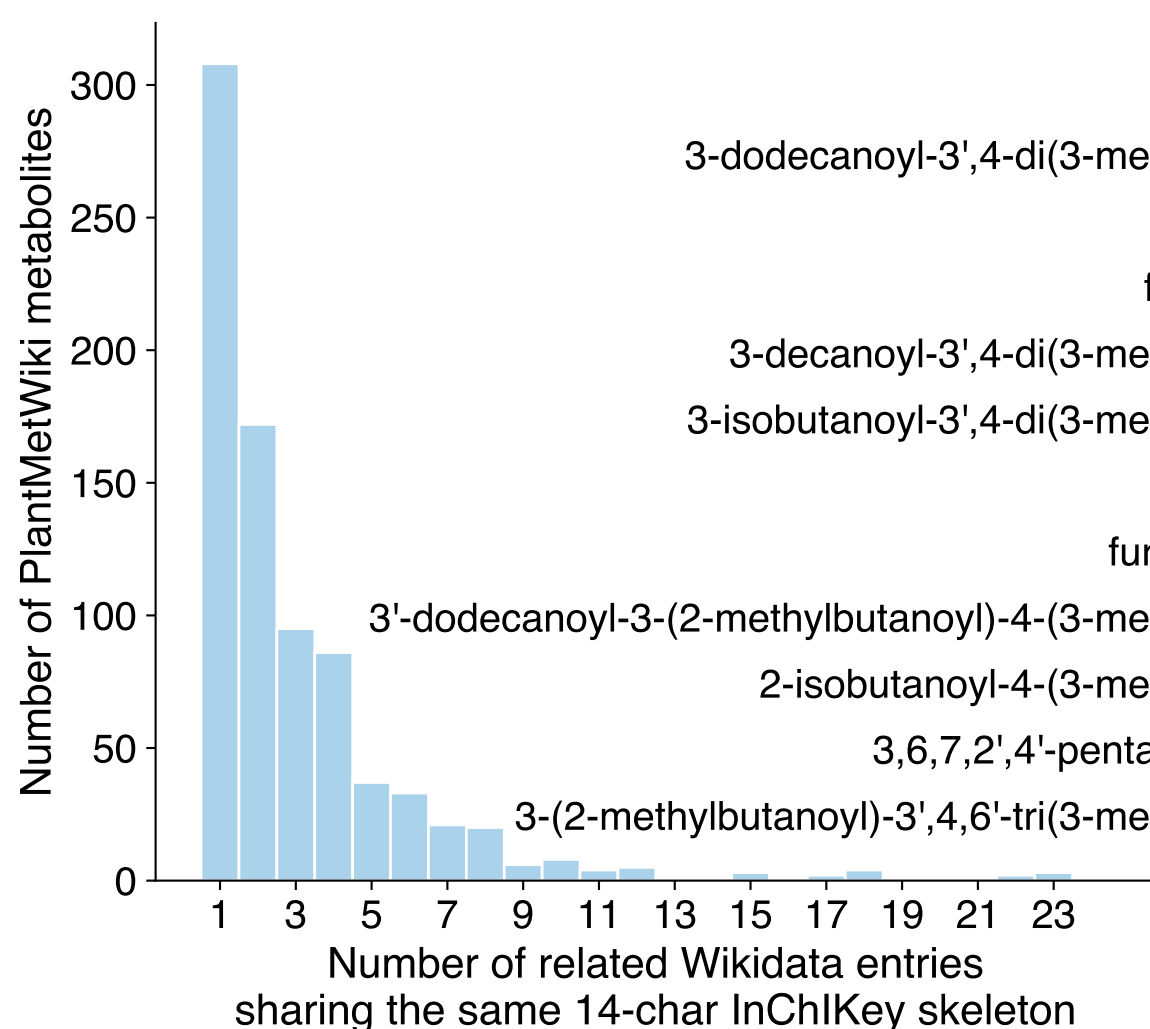

A. Wikidata coverage
(4,111 InChIKey-annotated metabolites)

B. Coverage gap concentrates in low-frequency (specialist) metabolites

C. Chemical diversity already in Wikidata
for the 814 skeleton-matched metabolites

D. Lineage-specific novel curation targets
(no Wikidata match, single producing species; labelled by genus)
